VCT2000 Discontinued

Issue # 75

Starting with VIDA 2010A (February) the process to remove the VCT2000 will begin. With the introduction of VIDA 2010B (May), the VCT2000 will no longer be a functioning tool for Volvo.

As was communicated earlier, with the launch of the DiCE tool (Special Tool Bulletin 160), support of the VCT2000 cannot continue indefinitely.

VIDA 2010A/B

All VIDA application texts that reference the VCT2000 will be removed.

VIDA 2010B

VCT2000 will be completely removed from the application, and the functionality will stop.

*** Note - There are planned upgrades to VIDA, in the near future, that will make the DiCE tool comparable to the VCT2000 for older model vehicles i.e. S40, V40, S70, V70, C70.**

Lastly, it is extremely important that every workshop has access to enough DiCE units to support their Service business.
