

Adjusting the handbrake

Note! As the illustrations in this service information are used for different model years and / or models, some variation may occur. However, the essential information in the illustrations is always correct.

Adjusting the handbrake

Detach the dust boot on the handbrake lever (pull straight up).

Fold up the plastic cover.

Adjust the handbrake.

Note! Full brake effect can be obtained between the second and fifth ratchet teeth. Check so that the handbrake is not constantly applied.

Note! After replacing the brake shoes for the handbrake the car must be test driven and the handbrake adjusted if necessary.
