Control Module - Diagnostic Trouble Code	Status
ATM	No fault found
AUD	No fault found
BCM-U042864 Invalid Data Received From Steering Angle Sensor Module - Algorithm Based Failures - Signal plausibility failure	DTC is found not active.
CCM	No fault found
CEM	No fault found
CEM	No fault found
DDM	No fault found
DEM	No fault found
DIM	No fault found
ECM-P050600 Idle Air Control System RPM Lower Than Expected	No fault found
ECM-P061A64 Internal Control Module Torque Performance - Algorithm Based Failures - Signal plausibility failure	No fault found
ICM	No fault found
MP2	No fault found
PDM	No fault found
PSM	No fault found
REM	No fault found
SAS-C009404 Steering Angle Sensor Analog / Digital Sensor - System Internal Failures	DTC is found not active.
SRS	No fault found
TCM-P074400 Torque Converter Clutch Solenoid Circuit Intermittent	DTC is found active.
UEM	No fault found
